 3) presume
 4) prohibit
- 70- In the experiment, the scientist will several of the variables in hopes of achieving the desired results.
 1) innovate
 2) legislate
 3) facilitate
 4) manipulate

Part B: Reading Comprehension

Directions: Read the following passage and select the choice (1), (2), (3), or (4) that best answers each question. Then mark your answer on your answer sheet.

In Chandigarh, a city in northeast India, there is an amazing garden. There are tall rocks and small paths between them. There are waterfalls, pools, and hundreds of sculptures. The sculptures are surprising because they are all made from rubbish, like plastic jewelry, bottles, broken pots, sinks, and pieces of electrical equipment.

The garden has a surprising history too because it was built in secret! A man called Nek Chand started building the garden in 1957. He chose some land in a forest near the city, where there were rocks and a river. Nobody was allowed to build here, so Nek knew that people wouldn't see him there. Then he started to collect rubbish and make the sculptures.

Nek's project was illegal, but for 18 years, nobody found it. However, in 1975, some government officials discovered it. By that time, the garden was nearly 49,000 m² in size. The government tried to destroy the garden, but when the people in the city heard about it, they wanted to keep it.

In 1976 it became a public park. After that, Nek Chand received a salary so that he could work in the garden full-time, and fifty more people were employed to work there
